

FlyDoc Joins Microsoft Office Marketplace

Microsoft Office print menu becomes virtual post office, fax machine

Madison, WI, September 20, 2006 – FlyDoc was chosen today to become a member of the U.S. Microsoft Office Marketplace, an online directory of third-party tools, services and add-ins that enhance the Office customer experience. FlyDoc is an online mail and fax service available directly from Microsoft Office applications. To be included in the Marketplace, products and services must prove they help customers improve their business productivity.

Available via a Windows print driver, FlyDoc integrates seamlessly with Office applications. With the FlyDoc service, Office users can send faxes and mail letters from their desktop applications. The documents are sent via secure internet connection to a FlyDoc Production Center where they are faxed or processed for mailing.

FlyDoc satisfies Microsoft's Trustworthy Computing Principles, surpassing the requirements for handling customer data in a private, secure and reliable manner. The service has a 99.5% uptime and technical support calls are answered in less than two minutes on average.

An integral part of the Microsoft Office 2003 environment, the Microsoft Office Marketplace website references a selection of tools and services offered by external suppliers to maximize the use of Microsoft Office including solutions for document creation, communication, document management, research, and training and assistance.

"The confidence that Microsoft places in us by adding our solution to Microsoft Office Marketplace confirms its relevance. Microsoft Office Marketplace is the ideal place for us to promote our solution to small and medium-sized businesses. This placement will enable us to reach millions of Microsoft Office users opening real business opportunities, especially since Marketplace is accessible directly in Office 2003 applications," noted Jean-Michel Bérard, Chief Executive Officer of Esker.

Mail and Fax Your Documents As Easily As Sending an Email

FlyDoc provides a solution for all types of business offering the benefits of a fax server and a mailroom without the normally associated capital investment. With FlyDoc, electronic documents are sent directly from the user's desktop applications such as Microsoft Office. The documents enter FlyDoc's worldwide network of mail and fax facilities, where they are transformed into postal mail and faxes and sent automatically. Users can monitor progress via a web interface available 24/7/365 and can call upon live technical support at no additional charge.
